WORK EXPERIENCE

Primary Health Care Corporation (PHCC) **Al Sadd, Qatar**

ICT Intern, ICT Department 2026

- Rotated across five ICT sections: Network, Systems, Cybersecurity, Database, and Applications
- Assisted with network troubleshooting, system administration, user accounts, and hardware/software support
- Gained exposure to cybersecurity practices, access control, database management, and enterprise applications

Qatar University **Doha, Qatar**

Instructor Assistant 2023 – 2026

- Provide academic and technical support to undergraduate students in Python and Java programming courses, assist in labs and practical sessions
- Collaborate with faculty to deliver course materials, supervise hands-on activities, and improve student engagement
- Contributed 200+ working hours to instructional support, mentoring, and academic project assistance

Special Needs Support Assistant

- Provided 250+ hours of academic support, attending classes to take and organize notes, transcribe lectures, and assist with course materials
- Used AI tools, shortcuts, and automation to accelerate notetaking, organize information, and simplify access to academic resources
- Created structured academic documents and materials while providing clear, patient communication and individualized support to students

CamelCodeQA **Education City, Qatar**

Assistant Trainer 2024 – 2026

- Delivered technology training programs for children covering AI, robotics, and game development fundamentals
- Mentored 20+ students through hands-on programming projects, strengthening problem-solving and computational thinking skills
- Supported seasonal bootcamps and summer camps while collaborating with instructors to enhance lesson plans and classroom activities

EDUCATION

Qatar University **Qatar**

Bachelor of Science in Computer Engineering 2022 – 2026

- **Grade**: 3.6 / 4.0 GPA
- **Dean's List**: 2023 – 2025
- Graduated with Highest Academic Distinction in Qatar Secondary Education with a score of 99.75% in 2022

SKILLS

- **Programming**: Python, JavaScript, Java, C, HTML5, CSS, Bash, Assembly
- **AI Tools & Frameworks**: Claude Code, LangChain, LangGraph, LlamaIndex (RAG), AI Agents, MCP (Model Context Protocol), Fanar API, Hugging Face, Google Colab, PyTorch, TensorFlow, Scikit-learn, Ollama, vLLM, llama.cpp, Model Quantization (GGUF), Speech-to-Text (Whisper, Cohere Transcribe)
- **Development Tools & Technologies**: FastAPI, REST APIs, Docker, Cloudflare, n8n, Apple Shortcuts, Git, GitHub, Cisco Packet Tracer
- **Cloud Platforms & AI Services**: Google Cloud Platform (GCP), Microsoft Azure AI, DigitalOcean, Hostinger
- **Hardware & IoT**: Raspberry Pi, Arduino, NVIDIA Jetson AGX Orin Developer Kit, ESP32, Embedded Systems, Microcontrollers, Sensors & Actuators, IoT Protocols
- **Operating Systems**: Ubuntu OS, macOS, Windows, Raspberry Pi OS
- **Other Skills**: Fast Typing, Microsoft Office (Advanced), Video Editing, Photoshop, Odoo

PROJECTS

Qullege, an AI Assistant for Qatar University Students (qullege.com)

- Launched a bilingual Arabic/English AI assistant serving 250+ students, powered by Fanar API, Qatar's large language model, to answer questions about courses, class sections, instructors, deadlines, fees, university policies, and campus locations
- Designed a multi-agent architecture comprising a guard agent, central routing agent, specialist agents, and fact-checking agent. An MCP tool server connects the system to live Banner class searches, academic calendars, the course catalog, campus maps, and web search, grounding responses in official Qatar University sources
- Created bilingual course and instructor name-matching algorithms that handle abbreviations, typos, and Arabic spelling variations, achieving 99.7% accuracy across 1,240 course titles and 100% accuracy on full instructor names for the semester
- Deployed the platform on Oracle Cloud with Caddy-managed HTTPS, server-side API key protection, a restricted admin panel, and rate limiting. Added a visitor analytics dashboard featuring heatmaps and session replay to analyze engagement and user behavior

AI Companion for Dementia Patients (Senior Project)

- Developing an offline, bilingual Arabic/English voice companion on NVIDIA Jetson AGX Orin that uses family photos to support natural conversations with dementia patients
- Integrated speech-to-text, local LLMs, and text-to-speech into a real-time speech pipeline, streaming responses sentence by sentence to reduce latency and maintain conversational flow
- Accelerated inference across all three models through GGUF quantization and CUDA optimization, achieving 13× faster speech generation on edge hardware
- Combined vision-language and face recognition models for photo understanding, with AI guardrails that ground responses in family data to reduce hallucinations

AI-Powered Developer Portfolio (Portfolio)

- Launched a production-ready AI portfolio platform on GitHub Pages, featuring a Fanar-powered, agent-based CV assistant that answers visitors' questions about professional experience, skills, and projects
- Implemented a secure serverless backend with Cloudflare Workers, using AI guardrails and response validation to protect API credentials, constrain answers to trusted CV data, and mitigate hallucinations
- Integrated visitor and traffic-source analytics to measure engagement and identify the channels driving traffic to the portfolio

AI Workflow Automation Systems

- Developed AI-driven automation systems for workflow orchestration using Python, n8n, and cross-platform integrations, enabling programmatic account management and Excel-based process automation
- Built AI-powered chatbots using LangChain and RAG with Supabase for data storage and vector search, enabling intelligent retrieval of company-specific knowledge and automated internal support

Fitness Mobile Application (MIT App Inventor)

- Built a mobile fitness application with a focus on usability and interactive design using MIT App Inventor
- Achieved 1st place in a high school competition for innovation, functionality, and implementation

LICENSES & CERTIFICATIONS

Foundation: Introduction to Deep Agents
Issued by *LangChain* — Oct 2026

Oracle AI
Issued by *Oracle, Meeza Academy* — Sep 2026

Claude Code in Action
Issued by *Anthropic* — Aug 2026

Introduction to Model Context Protocol
Issued by *Anthropic* — Aug 2026

Claude Code 101
Issued by *Anthropic* — Aug 2026

AI Fluency: Framework & Foundations
Issued by *Anthropic* — Aug 2026

Claude 101
Issued by *Anthropic* — Aug 2026

CCNA: Introduction to Networks
Issued by *Cisco* Dec 2024

Effective Sales Skills
Issued by *Dr. Ehab Muslim* Apr 2021

Technical Support Fundamentals
Issued by *Coursera* Sep 2020

SWOT Analysis
Issued by *Dr. Ehab Muslim* Sep 2020

Pricing Fundamentals
Issued by *Dr. Ehab Muslim* Jul 2020
